

JENOPTIK

## Diode laser stack in housing: qcw, passively cooled with tap water JOLD-x-QA-8A

Design 04022100824

### Features

- High optical output power up to 780 W for long pulses
- Wavelength: 808 nm
- Small and robust design, light weight (< 60 g)
- Sealed housing
- Cooling with tap water

### Applications

- Pumping of solid-state lasers
- Medical applications
