8. If you want to use a ProgRes® camera with a Microsoft **64 bit** operating system, you have to install a special Firewire Bus driver previously.

Detailed information regarding the Firewire bus driver installation you can find under the following link:

http://www.jenoptik.com/en-FAQ-DI-software-CapturePro-64-bit-busdriver

Jenoptik ProgRes DirectShow Filter Setup	
You are using a 64 Bit operating system! For correct working of this driver with firewire cameras it's madatory to install the T1394Bus driver. The next section will guide you through the installation process of this driver. You can always change the settings by using the wizard located in start menu. Start->Jenoptik->Tools->T1394Wizard_x64 The license for the driver use is granted only for Jenoptik cameras! If you agree with this, press YES!
